Quality Management System

From the very first day of its establishment, the logic of document management system of its founders coming from their experience in government sector, turned into quality management system by completing its paper work in 2000. We always firstly consider our quality management system that we received in 2000 and renewed every year, on our Corporation activities. Simet with its all functions and operating, used Quality Management System as main principle even whereas many corporations see it as nothing but a formality.

Our quality management system and all process taking part normal operating procedures is open to improvement and always supports quality.

Please improve and lead us.

ISO9001:2015

Information Security Management System

Simet Confidentiality Policy

Simet has the ISO27001 Information Security Management System Certificate

As Simet Technologies, it is one of our priorities to ensure the safety of the personnel data. It is our most important rule to act suitable with the legal regulation and law on protecting personnel data and its safety.

Our company Info and Security Management System Rules shown in our public web site.

ISO27001:2013

Customer Satisfaction Management System

CUSTOMER SATISFACTION MANAGEMENT POLICY

1. Our company has settled an effective interaction system that all the customers can easily forward their proposals, objections and complaints and presented this system in use actively under any circumstance.
2. Our corporate ERP system, located within the stem of this system that has been put forth in use, is our main platform in which the inquiries like customer requests and wishes can efficiently be forwarded to our company and handled discreetly only by administrative staff.
3. The customers receive feedback in every step in the interactions occurring with the customers, legal conditions in progress, our company ethic and commercial principles, ethic and commercial principles well accepted globally, our foundation policies and also evaluated by the public.
4. Queries, suggestions and complaints that have not yet reach to a conclusion are used to enhance and develop our general customer satisfaction and management policy.
5. Customer satisfaction is used as a healing impact for our companies all products and service understanding and produce solutions to serve more positive interactions.
6. Under the guidance of our company's operations that we have provided as structural profile above, we consider the customer satisfaction issue our primary concern and we promise to handle each and every suggestion, wish, complaint, dissatisfaction, objections and needs of our customers in most transparent attitude within the range of our company's business ethics.

ISO10002:2006

VENDOR/SUPPLIER B2B site :

tango.simet.com.tr

This web portal just for only Simet suppliers.

Suppliers (Vendors) can check and manage products, stocks, sales, inventory, sales demands, reports and market activities about their brand or brands on real time.

The screenshot displays the login interface for the Tango Simet Supplier Portal. At the top center is the Tango logo, which consists of a stylized 'T' inside an orange circle, with the word 'TANGO' in blue capital letters below it. Below the logo is a white rectangular box containing the text 'Simet Supplier Portal' and 'Please Sign In'. The login form includes three input fields: a company code field with a house icon and the value 'c19', a username field with a person icon and the value 'alicc', and a password field with a lock icon and masked characters '.....'. Below these fields are two buttons: a green 'Login' button and a blue 'Forgot Password?' button. A checkbox labeled 'Remember me' is located below the buttons. At the bottom of the page, the Simet logo is displayed, followed by contact information for Simet Technologies Inc. and a disclaimer stating that the site is for Simet suppliers and all names and logos are trademarks of their respective owners.
